Kota Bandung

Informatics Engineering graduate from UIN Sunan Gunung Djati Bandung with a strong foundation in System Analysis, Process Modeling (BPMN, UML), and Technical Documentation. Experienced in business requirement analysis, designing digital solutions, and structuring visual process models. Detail-oriented and analytical, combining technical IT analysis skills with practical business operations and data-driven cost control experience to optimize organizational efficiency.

Work Experiences

RM Alas Daun - Lembang

May 2026 - Present

Cost Control

- Analyze and record daily operational cost data to ensure corporate budget efficiency and financial integrity.
- Conduct regular inventory audits, reconciling system data with actual stock conditions to prevent data discrepancies and operational losses.
- Prepare and present structured financial and expenditure reports to management using data analysis tools.
- Identify operational inefficiencies and propose data-backed recommendations to minimize business overhead costs.

Informatic Engineering Department UIN Sunan Gunung Djati Bandung - Bandung

Oct 2021 - Nov 2021

Internship Business Analyst

- Conducted system analysis and gathered user requirements for the digitization of academic services.
- Modeled process flows structurally and visually using BPMN standards.
- Designed system blueprints, including Use Case and Activity diagrams using Draw.io, as a foundation for technical development.
- Collaborated with development teams to document system workflows and manage task assignments via Wekan.

Education Level

Universitas Islam Negeri Sunan Gunung Djati - Bandung

Jul 2018 - Jul 2025

Bachelor, 3.53/4.00

Project

Fun Fruit Crush Android Game Development

- Conducted system requirement analysis and workflow design based on the Fisher-Yates Shuffle algorithm.
- Produced technical documentation and project reports, designing comprehensive system diagrams (Flowchart, Use Case, Activity, and Class Diagrams).
- Validated system performance using Chi-Square and Runs Test.

Skills, Achievements & Other Experience

- Process & Analysis::** System Analysis, Requirements Gathering, Business Process Modeling, BPMN 2.0, Data Analysis, Troubleshooting, Cost Analysis
- System Modeling & Documentation:** UML, Flowchart, Use Case Diagram, Activity Diagram, Class Diagram, Technical Documentation
- Tools & Frameworks:** Draw.io, Notion, Trello, Canva, Git (Basic), Microsoft Office, Google Workspace
- Interest:** IT System & Operations, Quality Assurance, IT Suport, Technical Writer, Business Analysis, Data entry, Data Analyst
